AGENCE POUR LE DEVELOPPEMENT AGRICOLE

CLIMATE CHANGE ADAPTATION OF AGRICULTURE IN MAGHREB

French Fund for the Global Environment/ French
Development Agency

OBJECTIVES OF THE PROGRAM

The objective of the project is to help reduce the vulnerability of rainfed agriculture to the effects of climate change in Morocco.

INTERVENTION ZONE

Region of Fes Meknes.

DURATION

Five (5) years (2014-2018).

COMPONENTS OF THE PROGRAM

The project is structured around four components:

- Improvement and spreading of knowledge about climate change impacts in agriculture and adaptation measures to implement;
- Increasing the resilience of rainfed farming systems through experimentation and dissemination of innovative climate change adaptation technologies;
- Definition of effective climate risk management models;
- Technical assistance and monitoring-evaluation.
